

The 15th Student Himalayan Exercise Tour (SHET-15) -Recruit Participants-

In March 2027, 14 days with less than 800 USD

(Recommended by five academic societies including the International Association for Gondwana Research, Nepal Geological Society, etc)

Studying the true nature of the orogen in the Himalaya!

The tour covers the course Kathmandu-Pokhara-Muktinath-Pokhara-Lumbini-Kathmandu using a chartered bus. More than 30 Japanese and Nepalese geoscientists who are familiar to the Himalaya are registered to voluntarily work as a geo-guide and tour leader to show students in the field the beautiful Himalayan geology and nature. All necessary expenses including lodgings, foods, chartering vehicles, employing sherpas etc are included in the above cost. Some Japanese and Nepalese universities decided or are under consideration to give a curriculum point to participated students.

Program* of this exercise tour started in 2012 and the 2027 tour is the 15th tour. Report e-books (in Japanese and English) assembling reports by all participants and all logistic details of exercise tours every year have been published every year and are served for those who hope to join the tour as the free downloading by the URL and QR code below.
